Why do we still need CNN?

🎯 1. Teachable Machine is “shortcut learning”

Good for:

- Small datasets
- Demos
- Quick experiments

But...

👉 It cannot:

- Handle complex real-world variations
- Scale to millions of images
- Be deeply optimized

🎯 4. Real-world AI needs flexibility

Example:

You may want:

- Face mask detection
- Emotion detection
- Multi-object classification
- Medical imaging

👉 Teachable Machine ❌

👉 Custom CNN + Transfer Learning ✅
